WORK EXPERIENCE

Meganar Tech,[Madurai]

Ui UX Designer (SaaS)   Oct 2024 - Present

LearnHub – E-Learning SaaS Platform:

- Designed end-to-end user flows for both learners and instructors, improving the course engagement rate by 40%.
- Crafted intuitive dashboards, progress tracking UI, and responsive course player interfaces for web and mobile.
- Conducted user research and created personas to guide decisions on course navigation, module layouts, and onboarding.
- Collaborated with the dev team to ensure accessibility, responsive breakpoints, and seamless user interactions

MediaJungle – OTT Software (SaaS) Platform:

- Led the UX revamp for the platform, improving live-streaming access, subscription flow, and content discovery experience
- Redesigned homepage, genre-based carousels, and video player interface to enhance visual appeal and retention.
- Implemented smart navigation with a focus on reducing user friction across devices (smart TVs, tablets, mobile).
- Worked with product managers to map out the new feature set, including multi-language support and watchlists

ChatBot – SaaS Messaging Tool

- Designed a clean, minimal one-to-one chat system with an admin-to-user structure.
- Worked closely with developers to ensure performance-optimized, scalable designs across different user roles.
